

SAFETY & SETUP INSTRUCTIONS

Hook all 5 bungee hooks over top rail and hook to eyelets on the net

Always install with adult supervision! To prevent injuries never horse play or loop bungee around any part of your body

Working from bottom of net (weighted) to the top of the net (5 eyelets)

- 1 Roll out net along face of goal with red pk on left side.
- 2 Take longest bungees (2pcs) and loop 1 around the bottom of each upright post then hook bungee to eyelet next to weighted bottom. (helps center net)
- 3 Take shorter bungees (4pcs) and loop 1 around knee height and 1 around head height to each upright post then hook bungees to eyelets. (knee and head height helps create opening to retrieve balls that accumulate behind the net in the goal)
- 4 Take large hooks (5pcs) and hang over top rail above eyelets then pull bungee down and hook to eyelet. (helps hooking to eyelets)
